

Reaching Out To Veterans

We are attempting to reach out to prior military members who may have been in the Medical Corps, who have 4 year degrees in a science area, and who may be interested in going into the Optometric profession. This is a wonderful opportunity to make a very comfortable living and remain in the medical field. The New England College of Optometry is eager to reach out to our service men and women to offer this opportunity.

Martin Kinard, Director of Marketing and Recruitment New England College of Optometry Boston, MA
